

NET2S receives DataSynapse Certification

- *On-Demand Enterprise: Grid Computing*

DataSynapse, a world leader in dynamic application service management (DASM) software for the next generation datacenter, today announced that NET2S, a leading UK capital markets IT consultancy, has received Training and Certification to meet the growing demand for DataSynapse administration roles within the UK investment banking market.

NET2S consultants have completed DataSynapse training and certification to achieve the level of “Certified Engineer GridServer Administration and Operations.” NET2S is the first consultancy in the UK to have engineers with this qualification.

“Net2S personnel have already supported our mutual clients and we are delighted to formalise our relationship and add Net2S to our partner ecosystem,” commented Stephen Leel, vice president of Global Services at DataSynapse. “The DataSynapse Certification Training received by Net2S consultants will provide a vital source of high quality support for our UK clients.”

“Our partnership reflects our recognition of the widespread use of DataSynapse in the leading Investment Banking establishments in the UK,” said Frederic Ponzio, managing director of Net2S. “Our investment in certification will provide us with a unique value proposition for our joint clients and give them the peace of mind that any resource provided by Net2S will be highly capable of maintaining the high levels of service demanded by the Trading community.”

This is great news for NET2S and DataSynapse, it should bring more exposure for the range of solutions from DataSynapse and bring further opportunities for NET2S.

About NET2S

NET2S is a leading international consultancy specialising in capital markets technology. Since its creation in 1996, NET2S has built an impressive track record in consulting & advisory services, delivering complex projects and providing managed services.
